

organics...handle with care!

Kitchen waste rocks!

Choose how you put it in the **GREEN** bin, and you'll rock too.

Kitchen and other organic waste is a really important resource and we need it to make compost, not landfill. Collecting it to place in your **GREEN** bin is easier than ever now that you have the choice to: 'use a liner*', 'wrap in newspaper', 'go nude' or mix and match as your needs change.

*Compostable liners must conform to Australian Standard AS 4736. Please do not use bio-degradable or plastic bags in your **GREEN** bin.

For more information call **1800 33 55 99**
